

TOGETHER, WE ARE UNSTOPPABLE.

ANNUAL REPORT 2020 - 2021

**SURREY
HOSPITALS
FOUNDATION™**

OUR VISION, MISSION, AND BELIEFS

VISION

Our vision is to be Canada's unstoppable force for life-changing health care.

MISSION

We have a mission to inspire and enable our community to support innovative, life-changing health care.

WE BELIEVE

- World-class health care should be accessible to all.
- Everyone deserves holistic health care from birth to end-of-life.
- In never giving up on your health.

OUR CHARITY MODEL OF FUNDRAISING

WHO ARE WE?

Surrey Hospitals Foundation (SHF) is the largest non-government funder of health care for families in Surrey and surrounding Fraser Valley communities.

SHF PROGRAMS

PRIORITY AREAS

In addition to our fundraising campaigns, we also support ongoing priorities in the hospital (see details on the next page).

DONATIONS TO SPECIFIC AREAS

We ran 3 campaigns during this fiscal, including our Children's Health Centre campaign, surgery campaign, and COVID-19 campaign.

GRANTS

Our grants supported clinics and units across our facilities including enhancing care to patients, providing warm food and care items to vulnerable populations, purchasing equipment, and funding education for staff.

ONGOING PRIORITIES

1. Pediatric Health. Being the fastest-growing city in Canada, and with 43% of the province's children in our health authority, providing exceptional health care for children remains crucial. Though we were able to complete our \$6 million campaign to help renovate the Children's Health Centre, the need to support pediatric health continues to grow. We hope to make future investments to enhance all pediatric units at Surrey Memorial Hospital.

2. Mental Health. We are proud to support mental health for youth and adults through various programs, including the Child and Adolescent Psychiatric Stabilization Unit, Adolescent Psychiatry Unit, Adolescent Day Treatment Program, and our new program, Help For Hard Times, which aims to support families with children undergoing mental health recovery. Through these programs, we help patients learn life skills, build resilience, and re-integrate them into their communities.

3. Cancer. 60% of surgeries performed at Surrey Memorial Hospital (SMH) and Jim Pattison Outpatient Care and Surgery Centre are related to cancer. Due to our growing and aging population, cancer cases are projected to rise by up to 40% in the next 10-15 years. The need to support cancer care for children and adults continues to be of utmost importance.

4. Research. Innovation in research and education continues to be a high priority for us. We are proud to have funded Fraser Health's first Clinical Research Institute, as well as the Critical Care Tower at Surrey Memorial Hospital, which expanded the capacity for medical students and residents. Being one of the Clinical Academic Campuses of the UBC Faculty of Medicine, SMH also has a 125-seat lecture theatre and Fraser Health's first Regional Simulation Centre.

OUR FACILITIES

SURREY MEMORIAL HOSPITAL

Surrey Memorial Hospital (SMH) provides specialized care to families in our community, from birth to end-of-life. SMH is a significant regional hospital for Fraser Health, and the local hospital for one of British Columbia's fastest-growing communities.

SMH also has the nation's busiest Emergency Department, serving approximately 12,500 patients every month. The Pediatric Emergency Department is one of only two in the province; it serves over 43,000 kids every year. Almost 5,000 babies are born in Surrey Memorial Hospital's Mata Tripta Family Birthing Unit every year, making it one of the busiest maternity units in the country.

OUR FACILITIES

JIM PATTISON OUTPATIENT CARE AND SURGERY CENTRE

Jim Pattison Outpatient Care and Surgery Centre (JPOCSC) relieves pressures on our healthcare system by consolidating services that don't require an overnight stay, into one stand-alone facility.

The Centre provides a complete range of scheduled outpatient services, including day surgery, diagnostic services and specialized health clinics.

It features:

- Over 100 examination rooms and six operating rooms.
- More than 50 clinics, including the world-renowned Breast Health Clinic.
- A comprehensive medical imaging floor with two MRIs, including a donor-supported new 3Tesla MRI.
- A pain management facility which treats 800 patients a month.

Over the last year, JPOCSC served over 197,000 patients.

OUR FACILITIES

CZORNY ALZHEIMER CENTRE

Cloverdale's Czorny Alzheimer Centre offers a safe home for 72 dementia patients and is specially designed to provide both psychological security and comfort. Located in a quiet rural setting, this long-term care home, consisting of six, 12-room cottage living spaces, is tranquil by design: the architecture reflects an innovative, holistic, person-centred approach to dementia care. Specially designed pathways allow for continuous wandering routes past gardens and points of interest while keeping residents safe.

An interdisciplinary team of caregivers provides resident-focused care, 24 hours a day. The Centre offers recreational activities, communal kitchens, living rooms, a hair salon, a dance hall and a post office. Meals are tailored to the needs of residents and served individually. Each resident room has a memory box outside its door, to house old photos and mementos.

The Centre encourages volunteers to play music, read to residents, or help in the garden. Pets and children are welcome to visit. This follows the Eden principles of care, which seek to eliminate loneliness, boredom and helplessness through individualized care and connection with nature. The Alzheimer's Society operates an onsite resource centre.

MESSAGE FROM OUR LEADERS

JANE ADAMS

President & CEO
Surrey Hospitals Foundation

RON KNIGHT

Chair
Surrey Hospitals Foundation Board

This has been a year for the history books. Every unit on every floor of our hospital and facilities has been greatly impacted by the COVID-19 pandemic.

Surrey Memorial Hospital has been at ground zero as COVID-19 spiralled rapidly throughout our community, sending record numbers of patients to our ICU. The work of our health care teams resulted in some of the best COVID-19 survival rates in the world. They received praise from Canada's Prime Minister and the British Royal Family. Dr. Bonnie Henry paid us multiple visits to bolster the spirits of the frontline staff. Their dedication is unmatched. Our donors' generosity this past year ensured that these teams were equipped with the very best and most urgently required equipment.

In addition to supporting the urgent needs related to the COVID-19 pandemic, our donors helped support many other projects this year. Together, we kick-started Surrey's Interventional Radiology Program to help fight cancer. We invested more into the Simulation Lab at Surrey Memorial Hospital, which completed more than 2,400 hours of simulation education and 800 simulation sessions in 2020.

MESSAGE FROM OUR LEADERS

We funded new 3D technology for Fraser Health's first Chronic Pelvic Pain program, and we completed renovations of the regional Children's Health Centre.

Though events were paused and annual happenings were modified, our neighbours and community came forward to support their hospital in a big way.

We are fortunate to have such a caring and supportive community, especially during tough times.

Thank you to each and every one of our donors and supporters for helping us continue to support innovative, life-changing health care in Surrey.

OUR COVID-19 RESPONSE

On March 20, 2020, we established the COVID-19 Response Fund to facilitate donations as donors stepped forward to show their support. With the help of the community, we created the Meals of Thanks Program, which ran from April to May 2020. This program provided front-line staff with more than 100,000 snacks, 13,500 meals and 8,400 cups of donor-supplied coffee and tea. This was especially important as many restaurants and stores near the hospital had limited operating hours or were closed during this time.

Donors also reached out to provide personal protective equipment (PPE) for front-line staff. To help streamline these donations, we worked with Fraser Health and community partners to direct generous PPE donations to a ministry-approved vendor for testing and distribution.

By April 2020, our province had rapidly-increasing numbers of COVID-19 patients. We focused on the essentials. We kept in constant contact with hospital leadership and responded quickly to their requests for support.

In the face of the pandemic, the dedication of our front-line teams did not go unnoticed. As our region was the hardest hit health authority in BC, and one of the busiest COVID-19 centres in Canada, the Duke and Duchess of Cambridge held a video thank-you event with a team of front-line workers at Surrey Memorial Hospital in the summer of 2020. William and Catherine expressed their admiration for the team's brave leadership role in putting patient care first. Later in the year, Prime Minister Trudeau and Dr. Bonnie Henry also registered their personal thanks for the excellent outcomes.

OUR COVID-19 RESPONSE

Funds generously donated by our community have allowed us to acquire over 150 additional pieces of important equipment such as:

- **5 portable ultrasound machines** used by Respiratory Therapists when intubating COVID-19 patients.
- **2 vein finders** to establish lines and administer medicine to critically ill patients as quickly as possible.
- **4 defibrillators** to help restart the hearts of patients in cardiac arrest.
- **1 UVGI robot (matched by Fraser Health for a total of 2)** for thorough ultraviolet cleaning of the hospital.
- **10 optiflow monitors** which deliver oxygen to COVID-19 patients without intubation – one of the first sites in Canada to receive this innovative technology.
- **Continuous Renal Replacement Therapy (CRRT)**. A treatment used within Critical Care to support patients with very significant burden of illness.
- **2 Sara Combilizers**. The Combilizer supports patients who cannot move, but benefit from being upright and having a change in their position. This became invaluable to COVID-19 patients in the ICU.
- **Televisions were turned on 24-hours a day** for all 90 acute COVID-19 patient beds.

OUR COVID-19 RESPONSE

- Airvo devices
- Transportation monitors
- Bladder scanners
- Neonatal carbon dioxide monitors
- Otoscope
- Vital sign machines
- Isolation cart
- Stretchers and stretcher chairs
- Portable Ventilators

SIMULATION CENTRE AT SMH

Surrey Hospitals Foundation has proudly supported the Simulation Centre at Surrey Memorial Hospital since its inception in 2015. From the initial seed money to support clinical staff, to innovative simulation equipment purchases, our total investment in this important regional program to date is \$1.2 million.

When the COVID-19 pandemic began, this Centre quickly became an invaluable resource to staff throughout our health authority. Between March and June 2020, the team performed 217 COVID-19 simulations and trained more than 900 hospital staff. As new processes and procedures were updated at a rapid pace, 90% of their simulation training pivoted to include new pandemic protocols. With thanks to our investments, staff were trained using state-of-the-art equipment to simulate real-life scenarios in a safe and risk-free environment.

In 2020, we invested \$100,000 to new simulation technologies.

COVID-19 RESEARCH INVESTMENT

Investment in research has always been a priority for the Foundation, but COVID-19 has further underscored the importance of investing in this area. With donor support, we invested \$1.4 million to support 25 current research studies taking place in Surrey, along with the establishment of the Surrey Memorial Hospital Clinical Research Unit.

IMPACT STORY

THE HELP FOR HARD TIMES PROGRAM

The Help for Hard Times Program was provided to youth and their families after a stay in the Cloverdale Paint Child & Adolescent Psychiatric Stabilization Unit (CAPSU) at Surrey Memorial Hospital. After a successful pilot, RBC Foundation, a Surrey Hospitals Foundation Community Champion, funded the first three years of the program.

The goal of this program is to help parents, siblings and youth to become more resilient in coping with the mental illness journey after a stay in acute care. Skills such as effective communication methods and self care help guide the family to wellness.

The pilot program was to run in three communities within Fraser Health, but due to the COVID-19 pandemic, it soon became a virtual program. This meant even more families from other communities were able to access this important support.

The Help for Hard Times pilot program built skills, abilities, capacities and resiliency within individuals, families and the community. As families continued their healing journey from acute mental illnesses, they benefitted from support they didn't realize was available to them. Although all these teachings are designed specifically for individual families, the tools and skills that are learned will also have a positive impact for their broader communities. To date, approximately 200 families have benefitted from this program.

IMPACT STORY

The Help for Hard Times program is a contracted service provided by a community-based program called FamilySmart™. Over the past several years Surrey Hospitals Foundation has partnered with FamilySmart™ to support Youth-in-Residence (YiR) and Parent-in-Residence (PiR) programs in CAPSU. The PiR program at Surrey Memorial Hospital was the first of its kind in an acute care setting in western Canada.

These partnerships and pilot programs have been considered a great success. As such, going forward, they will be supported by the Mental Health and Substance Use Division within Fraser Health. Because of generous donor support, our Foundation was able to bring this much-needed group of services to a very vulnerable youth population in our region. We are very happy to hear they will continue as a regular offering for families and children dealing with acute mental health concerns.

Surrey Hospitals Foundation has been committed to supporting children and youth programs since the inception of the Foundation in 1992. Our hugely successful CAPSU fundraising campaign made it possible to build the unique, state-of-the-art facility and this next step to provide specialty services in the community is a natural extension of our commitment to youth mental health. We have and continue to work closely with the Mental Health and Substance Use Division within Fraser Health.

DISTRIBUTION OF FUNDS

2020 - 2021 CAPITAL EQUIPMENT & PROJECTS

Some of the capital equipment and projects supported this year include Tomosynthesis, Virtual Pet Project for the Children's Health Centre, UVGI robot, Rapid Infuser Pump, SAEBO VR, Sara Combilizer, Gamma Probes, CHC renovations, FBU renovations, SMH Rehab Project, and ultrasound for Jim Pattison Outpatient Care and Surgery Centre Pain Clinic.

Highlight – Children's Health Centre Mobile App: We are pleased to have supported the creation of the My Hospital Pal mobile app, an innovative augmented reality (AR) application for kids as part of our Children's Health Centre (CHC) renewal project. The first of its kind in Canada, the app features "Chip" the AR Squirrel as a virtual orientation to the hospital. Chip provides helpful information to children visiting the Children's Health Centre. Families are presented with a QR code to download the app on their devices, so that children may interact with Chip, who will guide them through the hospital setting and share what to expect during their visit. As our pediatric team treats over 50,000 children annually, we are proud to continue to support them with new and impactful innovations.

DISTRIBUTION OF FUNDS

RESEARCH & EDUCATION

Some of the research and education initiatives we invested in this year include the Strategic Priority Grant, Neuro Research Award, the recruitment of Dr. Xiaowei Song (Fraser Health's first-ever Senior Clinical Research Scientist dedicated 100 per cent to research), Dr. Tom Godwin's Lectureship, and nearly thirty COVID-19 research studies.

Highlight – COVID-19 Research Investments: During the COVID-19 pandemic, we invested in establishing a COVID-19 research infrastructure. We invested \$1.4 million to support 25 current research studies taking place in Surrey, and we established the Surrey Memorial Hospital Clinical Research Unit.

PATIENT COMFORT

A few of the patient comfort items we have supported this year includes Art and Music Therapy for NICU, Youth Mental Health, Electro Larynx (speech and pathology), iPads/tablets to provide better communication between COVID-19 patients and their families, infant warmers, mobile lifts, handheld oximeter for NICU, and ceiling lifts.

Highlight – iPads and Tablets: Over the past year, we have been fortunate to have received iPads and tablets from donors to support our patients. These devices provide a way for patients to communicate with their loved ones during COVID-19. This is especially important as hospital visitations continue to be limited.

There were a total of 36 devices received. 30 of these were distributed to COVID-19 units, 4 to rehabilitation patients, and 2 to residents at Czorny Alzheimer Centre.

CELEBRATION OF CARE GALA 2021

As our community was one of the hardest hit in Canada by COVID-19, we made the decision to cancel our 2021 Celebration of Care Gala. Instead, we shifted our plans to focus on supporting the hospital with what they needed to continue to provide world-class health care. We plan to bring back the gala once the pandemic subsides.

COMMUNITY CHAMPIONS

Surrey's business community is comprised of some of our biggest supporters; many return year after year to support our Celebration of Care Gala as well as the ongoing needs of our health care facilities. The Community Champions program was launched to formalize their support. To better meet the diverse range of support from our Champions, we have created four levels that businesses can participate in:

- **Luminaries:** \$1,000,000+
- **Visionaries:** \$100,000 - \$999,999
- **Leaders:** \$10,000 - \$99,999
- **Achievers:** \$1,000 - \$9,999

In 2020, the tremendous support of our Community Champions helped us close a \$6 million fundraising campaign in support of the Children's Health Centre at Surrey Memorial Hospital.

Our Champions were also significant supporters of our COVID-19 Response Fund, and some of our earliest donors to this urgent funding need. In the last year, our Champions donated \$894,780 to support the hospital's COVID needs.

COMMUNITY CHAMPIONS

Participation in our Community Champions Program is a way for businesses and organizations, large and small, to support their local hospital when support is needed the most.

Here are some highlights of our program this fiscal year:

PATIENT STORY

NEW INTRA-OPERATIVE FLUORESCENCE IMAGING SYSTEM SAVES PATIENT'S LEG

It is every home handyman's fear – falling off a ladder. Unfortunately, that's exactly what happened to Delta's Ed Maisey. He was cleaning the windows on his home when he lost his footing and landed on the ground in between the lawn and garden bed.

Ed's ankle took the brunt of the fall. "My foot was facing inward," he recalls, "My ankle was completely destroyed."

Shortly after his fall, Ed underwent surgery to repair his very badly damaged ankle. Hoping that would be it for surgeries, Ed started his healing journey. Six weeks later, however, Ed was back in the hospital with a rare infection related to the metal inserted into his ankle during surgery. The infection was aggressive, causing a large open wound to appear in front of his lower leg where it joins the foot.

PATIENT STORY

Ed became a regular at the wound care clinic at Surrey Memorial Hospital over the next while, visiting them every second day for months. He credits their expert care with saving his tendons, which were severely compromised due to the nature of the wound. Ed had been told that there was a strong chance he could lose his foot, but due to their great care, the ankle healed to where he could undergo reconstructive surgery.

“My full recovery from the wound ordeal started when I met Dr. Ratanshi,” says Ed. Dr. Ratanshi was able to close the wound completely, using an innovative method of transferring tissue from Ed’s thigh to his ankle. In order to keep such large units of tissue alive, this technique involves connecting tiny blood vessels by hand under the microscope (called ‘microsurgery’). Assisted by an advanced surgical microscope to sew the tiny arteries and veins together, and a new intra-operative fluorescence imaging system (SPY Elite™) to visualize circulation in the transferred tissue, Ed’s surgery went flawlessly. His limb was saved – he could walk again! Both pieces of equipment were recent purchases by Surrey Hospitals Foundation.

Dr. Ratanshi is one of Surrey’s newest surgeons, and one of the many talented specialist surgeons on the team. Investment in innovative surgical equipment helps attract and retain these specialists to our community.

FINANCIALS

Surrey Hospitals Foundation is committed to the highest standards of accountability and transparency. Our Board of Directors is a group of business leaders and health care professionals who guide us in our ambitious goals to lead the transformation of health care in the region.

Together, we focus on achieving results that are defined by impact on our community and effective stewardship of our donors' contributions.

COMMUNITY PARTNERSHIPS

REDFM GURPURAB RADIOTHON

The 14th Annual 93.1 RedFM Gurpurab Radiothon was held on the occasion of Guru Nanak's birth; the founder of the Sikh faith. Surrey Hospitals Foundation was one of two recipients of the RedFM Gurpurab Radiothon in 2020.

RedFM's listeners and community rallied together on this special occasion and raised \$515,000 to support our COVID-19 Response Fund. Funds raised from this event contributed towards the ongoing needs of the hospital to provide care for COVID-19 patients, including new pieces of equipment and research studies.

COMMUNITY PARTNERSHIPS

KWANTLEN POLYTECHNIC UNIVERSITY NURSING SCHOLARSHIP

Since 2005, we have supported the annual Surrey Hospitals Foundation Endowed Nursing Award to a KPU student enrolled in the Bachelor of Science Nursing program. To date, \$13,270 has been awarded to 16 students. The 2020 award recipient, as determined by the KPU Selection Committee, was Reygil Puerto. Congratulations, Reygil!
